

Assembly Tutorial

We have put together a very well down 26 page tutorial that all new customers should go through.

This tutorial will guide you step by step through defining parts in assembly and explain why each is done.

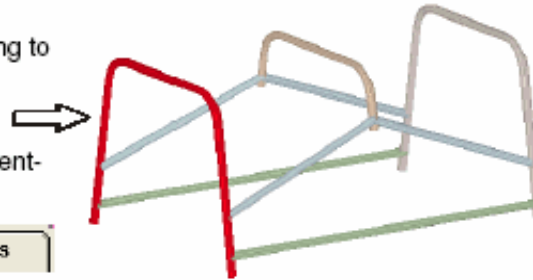

Please find the following hyperlink for your tutorial:

http://www.2020softwaresolutions.com...o_guide_a1.pdf

Here is an example of what you will find in the tutorial.

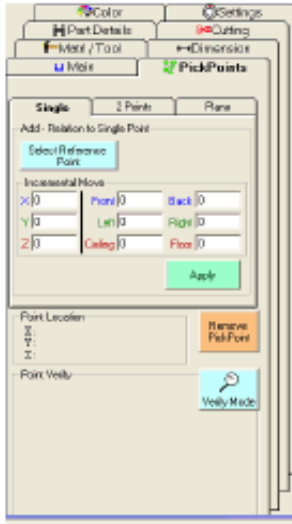

Creating the 1st Part:

Notice we have highlighted the part we are going to work on. The dimensions for this part are displayed in the 2nd pic on the right.

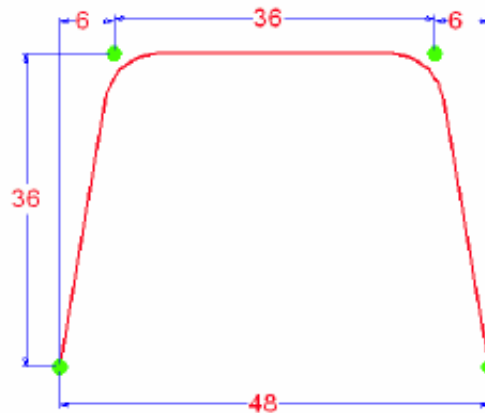

We are going to create the 4 PickPoints representing this part.

Select the "PickPoints" Tab.

Your tab display should appear like it is on the left.

Notice the Incremental Move values such as Front, Back, Left, Right, Ceiling & Floor.

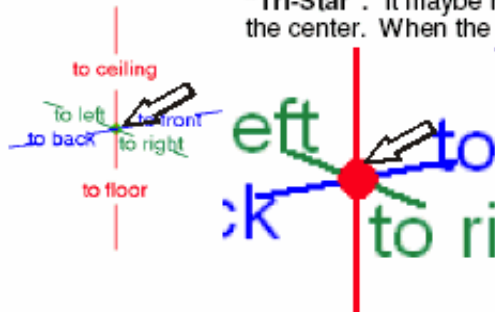

Select Reference Point

Select the "Select Reference Point"

command button: Pick the center of the

"Tri-Star". It maybe hard to see, however, there is a green pickpoint at the center. When the pickpoint is selected it will turn RED.

Enter a value of 36 into the Ceiling field.
