

Run Time Errors

Due to the LARGE influx of new sales we have had the past several months, there has been a number of customers getting run time errors when they first fire up the software. I have found the majority of these are because of old or missing needed Microsoft dll's and extensions.

The following link has fixed the vast majority of these problems:

If your system is XP or 2000, please select this link:

http://www.2020softwaresolutions.com...cripten_xp.exe

If your system is ME, 9x or NT 4.0 then this link:

<http://www.2020softwaresolutions.com...ad/scr56en.exe>

We haven't had any issues arise with Vista at this time. No links are available.
