Deleting or Removing a Part

This section will show how to remove or delete a part in the assembly. There are 2 different types of removing or deleting:

First Type Removing a Part from our Assembly

Select the "Remove" command button:

Create & Edit Parts Assembly Settings						
Main Edit PickPoints Dimensions Cutting Headers						
Move Features						
Move Part Move Feature						
Incremental Move						
Front: 0 Back: 0						
Left: 0 Right: 0						
Ceiling: 0 Floor: 0						
Clear Values Apply						
Parts						
Remove Rotate Stretch						

Select a PickPoint(s) on the part(s) you wish to remove:

Click the "**Remove Selected**" button to remove the part(s).

Create	& Edit Pa	arts Ass	embly	Settings			
Main	Main Edit PickPoints Dimensions				Cutting	Headers	
Remove Parts							
Name				Delete	•		
Nev	v Part N	ame					
Custom Part - 1					x		
Cus	Custom Part - 1				х		
					-		
Close Remove Selected							

Second Type

Remove a Part from the Master Part List

When you remove part from the assembly a "master" part will still be available for later use. If you desire to remove the part from the "master" list, select the part in the list as shown below and select the "**Remove**" button.

Cr	reate & Edit Parts Assembly Settings
М	ain Edit PickPoints Dimensions Cutting Headers
ſ	Master Part List
	Name Qty Key
	Custom Part - 1 0 0
	New Fait Name 1 1
	Remove Flush
10	

You can also select the "**Flush**" button to remove all of the parts from the master list with a quantity of 0 (not in your assembly drawing.
