

Cutting the End of a Part

The following are the steps to setting up the cutting the end of a "part" .

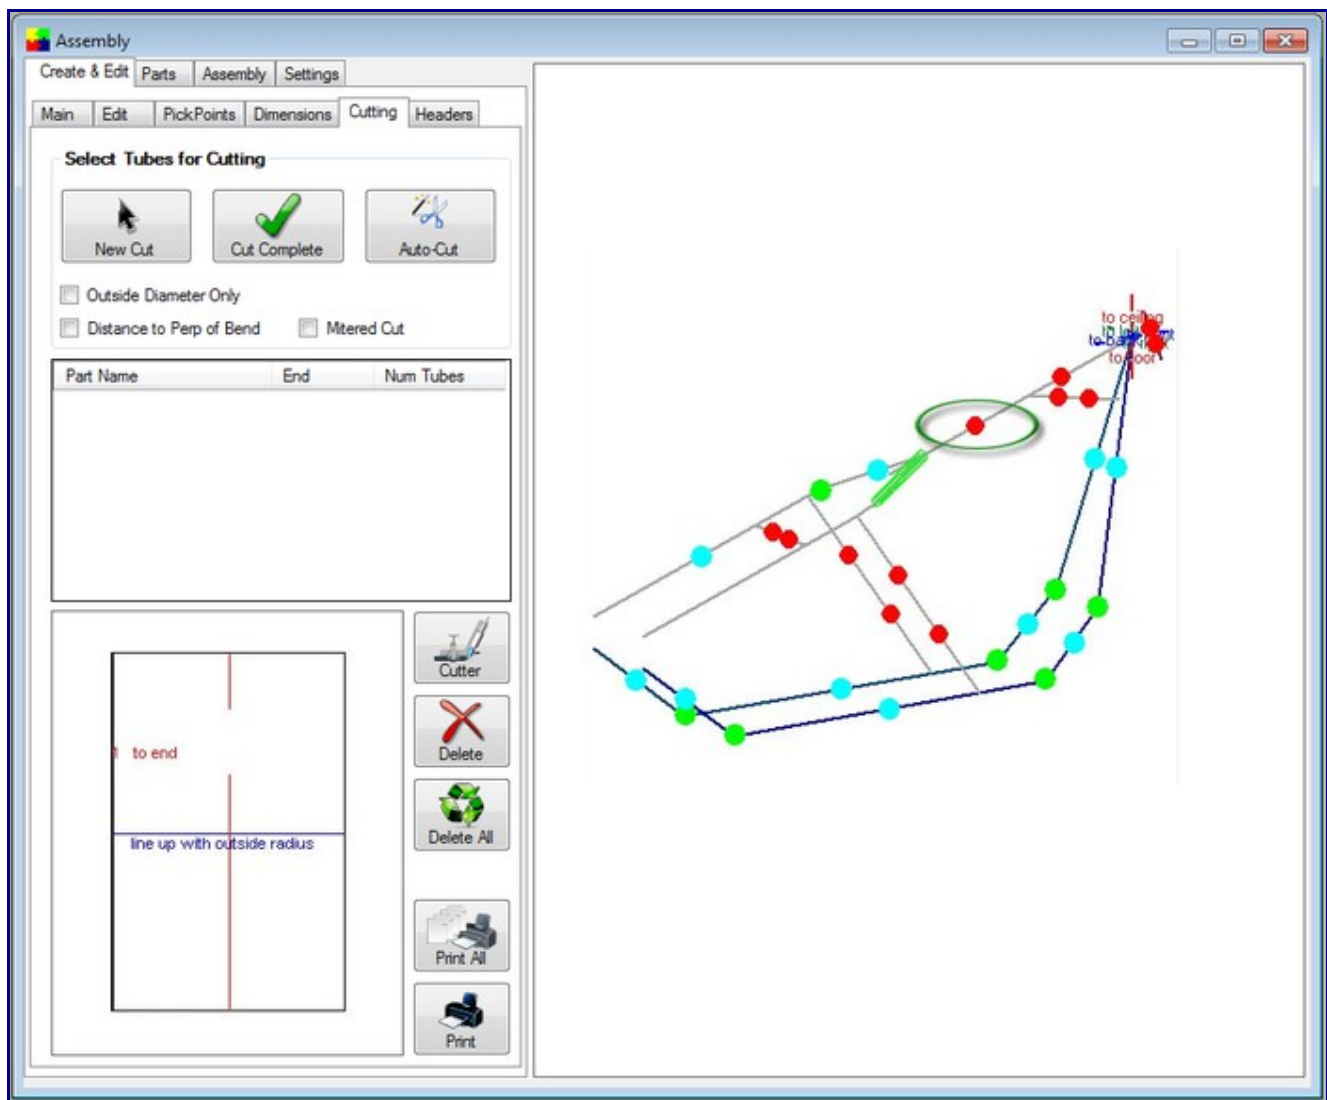

Step 1) Select the **"Cutting"** tab.

Step 2) Select the **"New Cut"** command button.

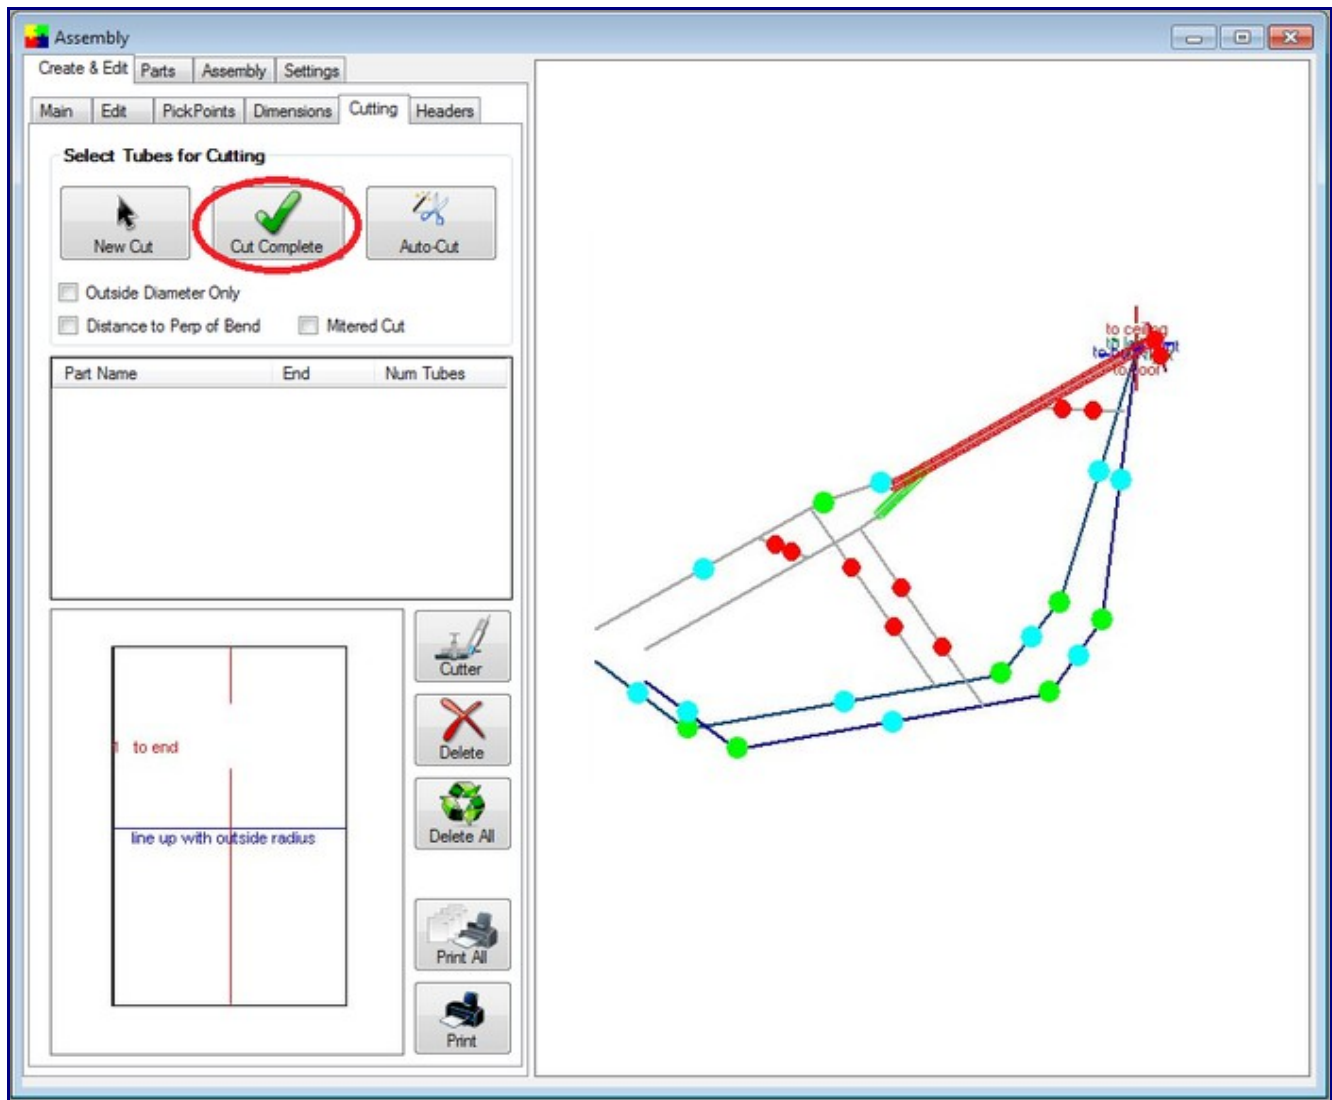

Step 3) **Select the tube you are going to cut. Note: The straight end of a bent part will have a blue PickPoint on it.** Select this PickPoint. You will find our part turn green in color.

Step 4) **Select the dot(s) representing the tube section(s) that our part is going to be cut to.** You will find the intersecting tubes will turn red.

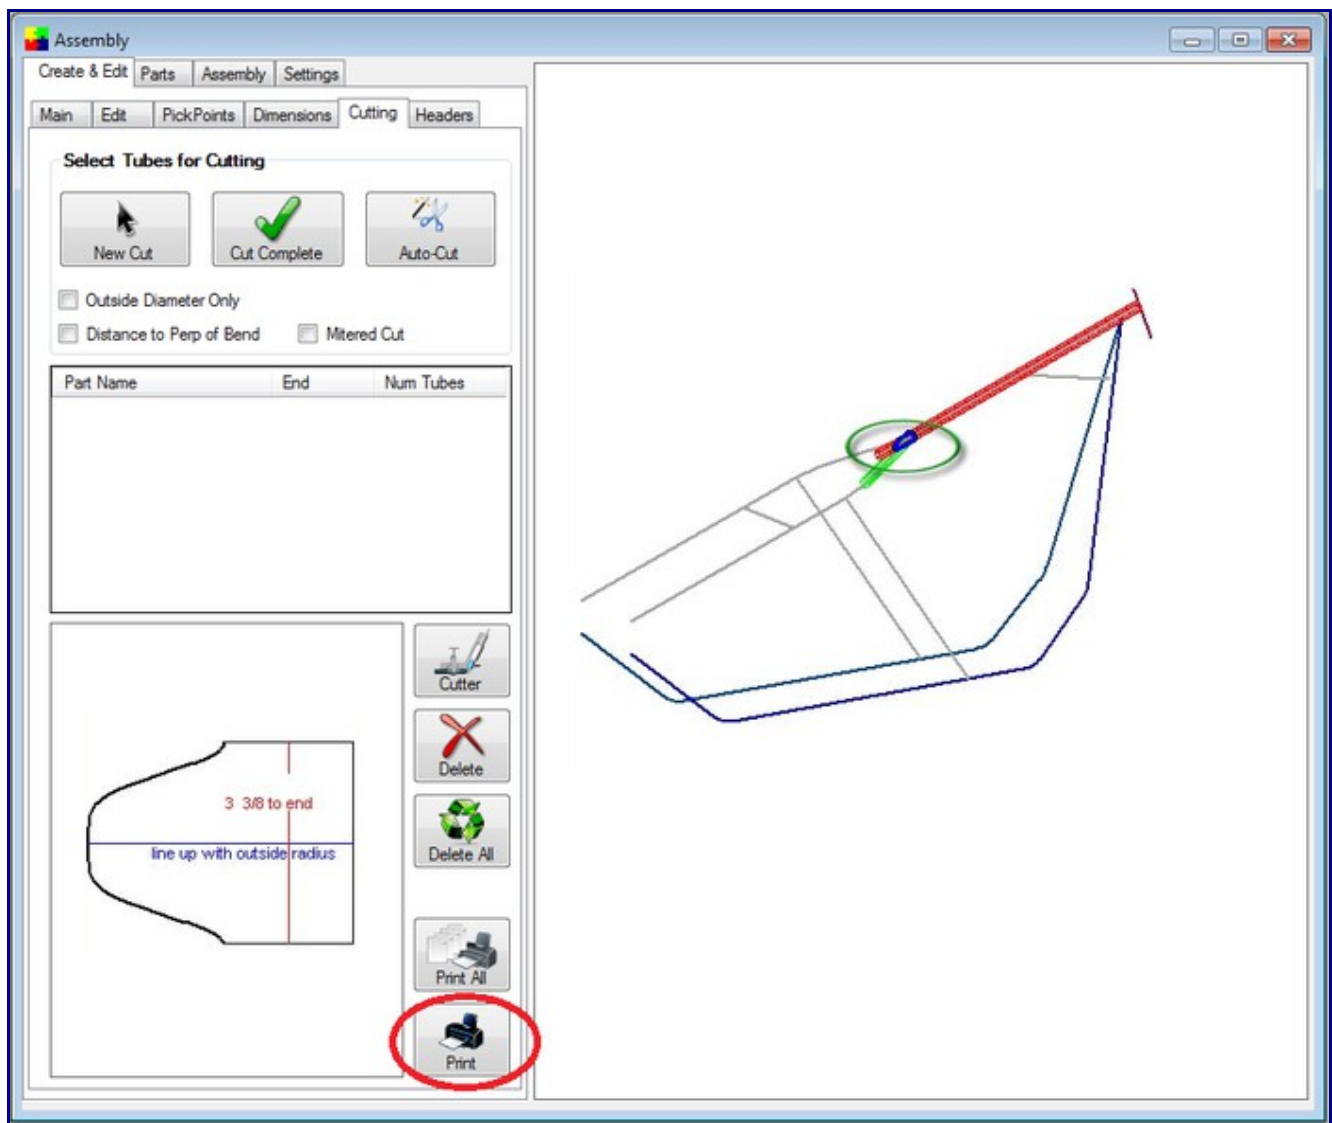

Step 5) Select the **"Cut Complete"** command button.

Notice the intersection now has a black and a blue cut marks showing the inside and outside of the material where each meets the intersection part(s).

Step 6) Select the **"Print"** command button.

The cutting templates can be called up at a later time by selecting them from the list shown.
