

# How do I have a 180 degree Bend?

You must use the "dim type" of "tangent" for this. An "apex" does not exist because the 2 edges never intersect each other (they are parallel in 180 degree bend).

Die: 3.0  
Material: 1.75 DOM  
Cut Length: 49  
Part Weight: 0

A	B	Location	Rotation	Angle	Spring Angle	CLR	Bend Length	Orientation
1	1	12	0	180	180	3	9	From Start
2	2	33	180	90	90	3	4	From Start

Number of Bends: 2  
Start Angle: 0
